

Pinnacle Web

Get total control of your Pinnacle System

CONTROL YOUR PINNACLE SYSTEM FROM ANY BROWSER, ANY TIME, ANY WHERE.

Go beyond the Windows operating system

Pinnacle can be accessed from any computer in the network through any Web Browser such as Internet Explorer, Safari, Fire Fox and more. Now you can run Pinnacle Web Clients from Unix, Linux, McIntosh and PDA's.

Easy to install and upgrade

The Pinnacle Web application is installed on the same computer that is running the Pinnacle database server. All updates or upgrades are performed at the database server - eliminating the need to update the clients.

Enhanced security

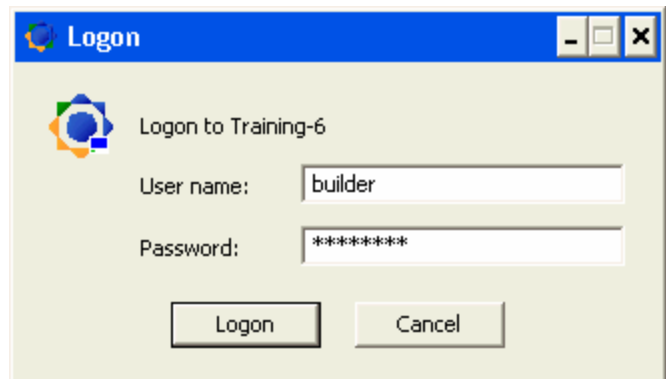

Pinnacle and all its data are secure on a central server behind the firewall. Transmissions are fully encrypted including Secure Socket Layer (SSL) and 256-bit AES encryption.

Access your system any time, any where

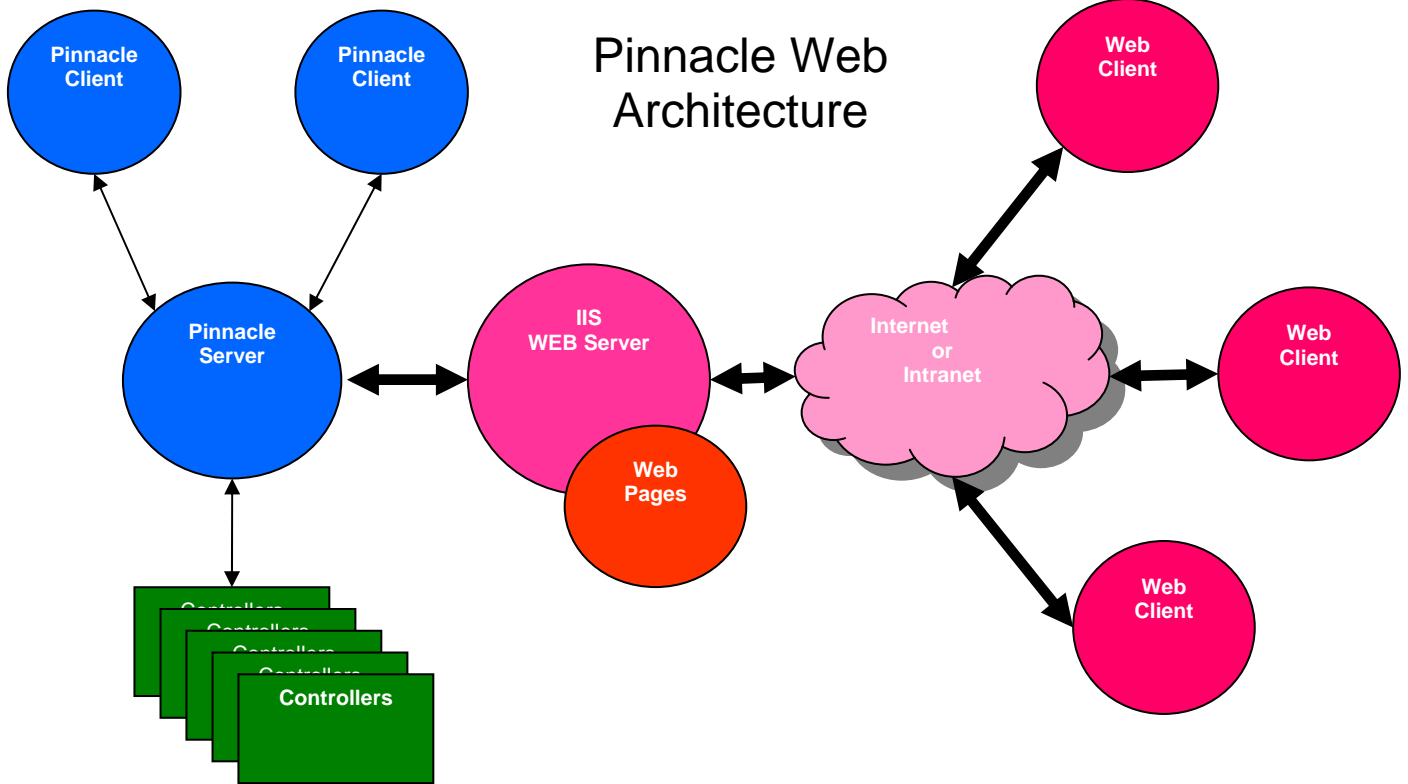

When Pinnacle web server is available to a domain name or public IP, access to the application becomes global. All connections are password protected and encrypted.

Virtual desktop

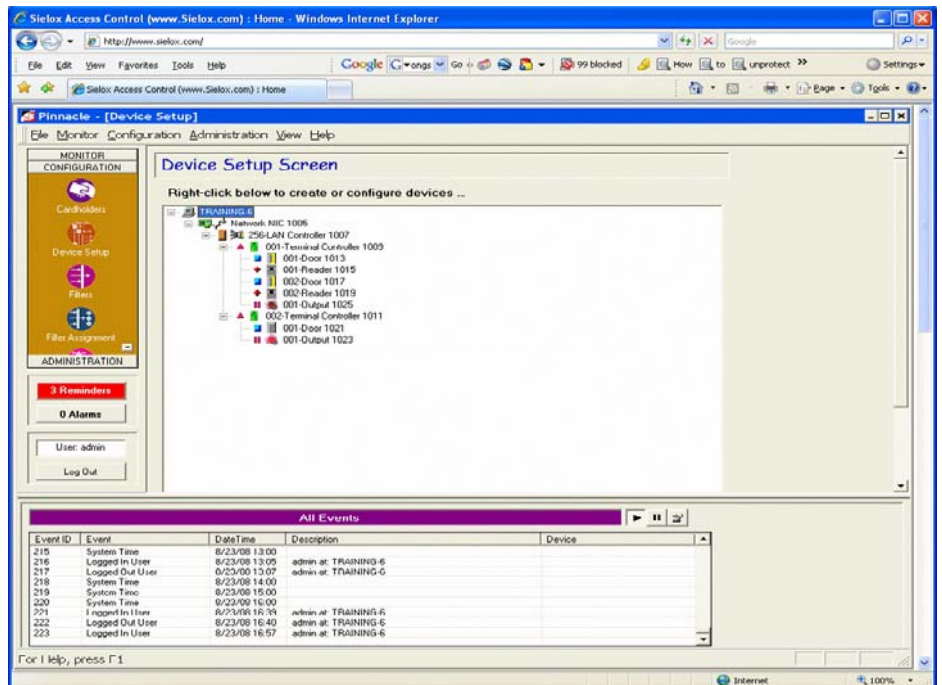

Pinnacle Web client allows you to run the Pinnacle application, Pinnacle utilities, and any other programs that you expose on the virtual desktop to the operator.

Pinnacle Web Architecture

NOTE: Pinnacle Web will not encode cards on the web client workstations.
