Sielox™ Announces Fully Integrated Access Control/Visitor Management Solution and Reseller Agreement With EasyLobby®.

Provides Unprecedented Control Over Managing Visitor & Contractor Card Access.

Las Vegas, NV (September 24, 2007) – Sielox, the leading provider of access control systems, has announced the availability of EasyLobby's SVM (Secure Visitor Management) software as an add-on software module for Sielox's Pinnacle Access Control Solution. EasyLobby's suite of products provides complete, fast and secure visitor registration, web-based pre-registration, management, reporting and badge printing.

With the new integration module, Pinnacle customers will be able to issue different levels of card access to visitors, contractors and employees directly from the EasyLobby SVM visitor form. When a visitor or contractor is badged using SVM, the person's name, their photo, the employee being visited, the access level to be granted, the card number and the expiration date/time is automatically passed from the SVM database to the Sielox Pinnacle access database, and the card is activated. In addition, when the

person is checked out of EasyLobby, the Sielox Pinnacle database is immediately notified and the card is deactivated. Cards do not need to be pre-programmed, and they can be re-used.

"A growing number of end-users are looking for a more complete integrated solution for lobby management and access control," said Sielox President Karen Evans.

"EasyLobby's software allows users to maintain tight controls from initial badging all the way through the access control process. It's a more complete visitor management solution."

"More and more of our customers are implementing this type of integration between our award-winning visitor management system and their access control system," said Howard Marson, CEO of EasyLobby. "The tight integration with Sielox allows our joint customers to quickly and easily grant card access to those visitors or contractors that require it, without having to expose the access control system to their guards and receptionists working in the lobby."

Sielox is also announcing that they are now an authorized dealer for the full line of EasyLobby visitor management products. Sielox Business Partners can order the EasyLobby-Sielox integration module, plus EasyLobby's full suite of visitor management and web pre-registration software, and a broad array of value-added peripherals (passport/license/business scanners and readers, badge printers, cameras, signature pads, barcode scanners, fingerprint readers, card readers, etc.) through Sielox Customer Service.

EasyLobby is a registered trademark, and EasyLobby SVM, SVM Mobile, eAdvance, Satellite, Satellite Mobile, and Administrator are trademarks of EasyLobby, Inc.
