Sielox™ Moves Ahead In 2006.

The Former Checkpoint Systems Access Control Products Group

Enhances Operations Across All Areas of Business.

Las Vegas, NV (April 5, 2006) – This has been a year of positive changes for Sielox™ – formerly Checkpoint Systems Access Control Products Group. Sielox is now a subsidiary of L Q Corporation. According to Karen Evans, President and General Manager of Sielox™, the company will continue to market access control solutions with renewed vigor and a more aggressive business model targeting every aspect of product development and operations.

The newly formed Sielox is comprised of key technical, sales, engineering, and marketing personnel from Checkpoint Systems' Access Control Products Group. They will continue to support the Pinnacle™ Access Control Solution, LANLink™ and AC-1200 Series 32-bit Controllers, Threshold Enterprise® software, 8-bit and 16-bit Controllers, Performa® and Mirage® readers and cards through an existing network of more than 200 authorized business partners and their 1,000 trained technicians.

In 2006, Sielox™ will also actively pursue new business development strategies aimed at both existing and new vertical markets, according to Evans. Additionally, Sielox™ will benefit from enhanced R&D aimed at further developing access control and event management solutions with the open architecture necessary to meet enterprise market needs.

"As Sielox™, we anticipate the ability to serve our customers even better, with a highly focused team of experienced employees in addition to new employees and new capital," said Evans. "We will be adding headcount in engineering to accelerate product development, and in technical support for assistance after the sale. We will have moved to new headquarters facilities with a new warehouse, all designed for enhanced product development, logistics, shipment tracking, technical support, and training."

Sielox™ Partners With Sonitrol to Market Pinnacle Access Control Solution.

Las Vegas, NV (April 5, 2006) – Sielox – formerly Checkpoint Systems Access Control Products and now a subsidiary of L Q Corporation – announced a sales partnership with Sonitrol Corporation, the leading verified electronic security provider, headquartered in Berwyn, PA. The new marketing agreement between the two companies allows Sonitrol to brand and sell Sielox’s popular Pinnacle Access Control Solution. Sonitrol will direct its sales and marketing efforts for Pinnacle to enterprise-level customers who want to manage their own access control security program.

“We are very excited and pleased to form this sales and marketing arrangement with Sonitrol,” said Karen Evans, President and General Manager of Sielox. “Sonitrol is a recognized leader in the security industry with a very strong presence in the multi-tenant, multi-client facilities market. This is the perfect environment for Pinnacle’s powerful and versatile feature set and capabilities.”

“Our agreement with Sonitrol reflects the type of new business opportunity we will continue to pursue as the new Sielox,” continued Ms. Evans. “We will capitalize on the

core strengths of our sales partners and our organization to collectively penetrate new vertical markets and to enhance our access control solutions with the features and functionality best suited for these markets' specific needs.”

“We chose Pinnacle because it is scalable, flexible and works well in a variety of customer industries,” said Gregg Groenemann, Vice President of Marketing, Sonitrol Corporation. “Pinnacle is well suited for enterprise-level accounts and is a strong complement to our existing Managed Access solutions suite.”

Pinnacle is Sielox's next-generation, feature-rich event management system. Pinnacle 5.0 gives users greater control over their company's security, whether for a small office or a building campus with multiple access security points. The Pinnacle suite includes an e-mail report scheduler, alarm notification on start-up, a parity check configuration option for error detection, additional content in the Help-About screen, and an automatic reconnect feature should a network connection be lost.
