

LOCKDOWN HEADQUARTERS

Sielox integration with Schlage AD, NDE, LE Series wireless locks and Von Duprin RU RM kits provide a cost effective, real-time solution for those seeking true online lockdown capability. Users may lock and block any or all doors allowing only privilege card holders access. Advanced features include Lock Toggle for single door locking and unlocking with one credential, Card + Pin dual authentication (AD 400) and Two-Man Rule functionality.

Pinnacle Schlage WiFi enables offline, scheduled management of doors using the building's existing WiFi network installed with Schlage® NDE series and LE mortise wireless locks without the use of a control panel.

Sielox offers the time-saving over network reprogramming (ONR) to upload firmware for Allegion locks, Gateways and PIMs without system disruption.

AD400 Mortise 900 MHz	Available
NDE Cylindrical BLE	First To Market
LE Mortise BLE	First To Market
NDE Cylindrical WiFi	Available
LE Mortise WiFi	Available
ONR Firmware RS485	First To Market

Sielox is proud to offer Layered Security Systems providing a smart way to protect people, property and assets with the highest levels of performance, reliability and cost-efficiency. Since 1979, Sielox has built its expertise working with integration partners and end-users in all types of facilities using our "Made in USA" lockdown solutions.

Innovative Security Management Since 1979

Sielox has provided innovative layered security systems for more than forty years. Sielox is a provider of the complete product line of Allegion locks, credentials and readers and has completed real-time online and WiFi offline integration of the AD, NDE and LE wireless locks.

The company continues to lead the industry with first-to-market integration of Schlage wireless locks, ONR firmware updates and Von Duprin exit device kits. Another first-to-market integration of Schlage NDE with Interior Push Button allows for more lockdown control.

Sielox develops a unique and highly focused integrated suite of access and emergency notification solutions for any size facility across numerous vertical and mainstream markets. The Sielox portfolio of advanced solutions designed for stand-alone or integrated implementation includes: Pinnacle® 11 Advanced Access Control, 2700 Intelligent Controller, CLASS Crisis Lockdown Alert Status System™ (CLASS), and AnyWare™ Browser-Based Access Control Platform.

The company partners with a network of regional and local systems integrators who provide Sielox Security Layer systems including CLASS lockdown alert level and physical electronic locking of perimeter and interior doors, the most comprehensive safeguard in the security marketplace today.
